EXPERIENCE

AFRIHEALTH – Lagos, Nigeria
Full Stack Engineer   *Feb 2025 – Present*
- Build and maintain interactive React components for clinical workflows, including patient intake, diagnosis entry, and prescription management.
- Optimized API performance, reducing average response time by 35% through database indexing, query refactoring, and strategic caching.
- Streamline frontend-backend integration by creating reusable API services and data transformation utilities, ensuring clean, predictable data flow and reducing development time.

Konga Online Shopping Ltd. – Lagos, Nigeria
Software Engineer - Contract   *Apr 2022 – Feb 2025*
- Maintained and enhanced multiple microservices powering konga.com using Node.js, PHP, Magento, GraphQL, and NestJS, ensuring platform stability and scalability.
- Led a backend team in building Konga's affiliate marketing platform, which enabled 1,000+ affiliates to earn commissions and increased referral traffic to the site.
- Built and deployed custom internal npm packages to a private registry, streamlining developer workflows and accelerating feature delivery across engineering teams.
- Wrote unit, integration, and regression tests to uphold production quality, contributing to a significant drop in post-deployment incidents.
- Upgraded legacy microservices from Node.js v7 to v18, resulting in improved runtime performance, reduced build-time errors, and smoother integration of modern tooling and features.

LEADERSHIP

GOOGLE DEVELOPER STUDENT CLUB, UNIVERSITY OF LAGOS - Lagos, Nigeria
Core Team Member / Lead, Events Management Team   *Jul 2019 – Jul 2021*
- Facilitated the planning and execution of events and coding boot camps for over 250 students, which increased the percentage of students with programming skills.
- Tutored 20+ students over 5 days on how to create an API with Node.js.

THE INVESTMENT SOCIETY, UNIVERSITY OF LAGOS - Lagos, Nigeria
Member, Technology & Lead, Web Development Team   *Mar 2019 – Jan 2020*
- Handled the development of the first web pages for the society as a member of the maiden technology division.
